Life insurance cost indices are based on the guaranteed amount payable on death.

Based on guaranteed 2.00% interest rate and guaranteed charges, Surrender Cost for 10-Year would be \$41.32 and Surrender Cost for 20-Year would be \$37.10. Net Payment for 10-Year would be \$81.20 and Net Payment for 20-Year would be \$53.12.

An explanation of the intended use of these indices is provided in the life insurance buyer's guide. These indices are useful only for the comparison of relative costs of two or more similar policies. The planned annual premium less annual charges for riders is used for the basic policy premium in calculating the indices above.

Tax Status

The Lincoln *MoneyGuard*® II Death Benefit is generally received by the beneficiary income tax-free under Section 101(a) (1) of the Internal Revenue Code (IRC) and the Long-Term Care benefits paid are not taxed as income under IRC Section 104(a) (3). The owner will pay no current income taxes on interest earnings credited to the policy's Cash Value.

Based on our understanding of applicable law, the projected policy is a Modified Endowment Contract (MEC) as defined in section 7702A of the Internal Revenue Code. Distributions from a MEC may be subject to income tax, and an additional 10% federal income tax penalty applies to taxable distributions received before the policy owner reaches age 59 1/2.

The Pension Protection Act of 2006 (PPA) changed the tax treatment of your MoneyGuard policy effective January 1, 2010. Based on our understanding and analysis of the PPA:

- Qualified Long-Term Care Rider charges will continue to be treated as distributions from your policy, but Lincoln will not report the distributions as taxable (even if your policy is a MEC).
- Qualified Long-Term Care Rider charges will reduce the investment in the contract (cost basis), but not below zero, as the charges are taken from your policy.
- Once the investment in the contract has been reduced to zero, distributions for Qualified Long-Term Care Rider charges will come from any gain in the contract (but will still not be reported as taxable distributions). You will receive a 1099R form for the charges, but the charges are not reported as taxable.

Please note that the state income tax laws in certain states may not conform to the federal income tax treatment of the Qualified Long-Term Care Rider charges described above. In such states, the charges may be treated as taxable distributions from the policy for state income tax purposes. However, the federal income tax treatment described above will continue to apply to such charges.

It is important to remember that these rider charges now and in the future impact the policy's cost basis. In the event any other financial transaction is requested, such as a request to exercise the Return of Premium Provision, the cost basis is used in determining if that transaction creates a taxable event. As previously noted, the cost basis is reduced as a result of these rider charges. Any Return of Premium Benefit paid upon full surrender of the policy is treated, for Federal income tax purposes, as being funded in part by a refund of the charges taken from the Long-Term Care Acceleration of Benefits Rider and the Long-Term Care Extension of Benefits Rider (if applicable), and in part by the value of the underlying policy. The full surrender of the policy may result in a taxable event and the owner should consult his/her personal tax advisor regarding this and other applicable tax matters.

Lincoln Financial Group® affiliates, their distributors, and their respective employees, representatives and/or insurance agents do not provide tax, accounting or legal advice. Clients should consult their own independent advisor as to any tax, accounting or legal statements made herein.

Return of Premium Benefit Disclosure

The Return of Premium Benefit does not apply until all planned premiums have been paid.
